The Site is West 221 Street South, Bristow, Ok. (West 221 is also called Refinery Road and E0810 Rd.) The location is just past the intersection with McDonald Drive. This is next to the exit 196 of interstate toll road 44 as it runs south west to Hwy 66.

So I'm saying that if you need an intersection it is McDonald Road and West 221 Street South. That is real close to the South West corner of the Site.

Bill, I was informed that they will need the actual site location. A Hwy, nearest intersection, etc. wonder if you can google that?

This is the only info I have: Wilcox OIL Company Located in Bristow, Creek County, Oklahoma
Site# OK 0001010917
Location: Wilcox Oil Company (I'm not sure this is correct)
W. 221 St.
Bristow, Ok 74010

PRP's: I don't know of any.

Bill, I was out of the office yesterday.... We still do not have a date when this will be proposed... In the meantime, Contracts will need: Site address, Site ID #, Names of any PRPs in order to task this....

Donn,
PLEASE, get this to Hank so I will have this done before I need it and it's too late. I have a meeting on Wilcox today and this could happen very quickly, we are just waiting for HQ to give it the OK. This is a high priority, please get this started.

Thanks,
Bill

Bill,
I have not received any information or request for COI Screen from Donn regarding Wilcox Oil.
If Donn wants this site added to the CI Task Order he will need to send me a COI screen request with site information and PRP list which I send on to the CO for submission to Hill.
It usually takes Hill about 10 days to complete the COI screen and if there is not any COI then Donn could request the site be added to the Task Order.
The process does take some time to complete (about 10 days for COI screen, and about a week to get the Task Order Mod by CO) once started. So it will take several weeks to get this site added.

Thanks, Hank

Hank,

I'm trying to get this process(See e-mails below) started so I don't run into the May-Cooperage thing we just went through. Have you heard from Donn about getting CH2 to start this process for Wilcox Oil? The site is going to be proposed to the NPL.

Thanks Bill

Hi, Bill...My understanding is that before CH2M HILL can begin work on a new site, the Task Order Manager (Donn) would provide the PRP list to Hank Thompson and request that Hank/Mike Pheeny ask us (HILL) to conduct a conflict of interest screen. Once we have completed the screen, we submit the results to Hank/Mike and then, if no conflict is identified, EPA authorizes us to work on the site through a Task Order modification. We cannot begin conducting the screen until we are asked to do so by Hank/Mike and cannot begin work until the screen is complete and EPA modifies the Task Order to include the site. The time the process can take varies, depending on the number of PRPs.

Ok, Lorraine please use this as your get up and go, and send Donn something about starting. Make sure you copy me so I can follow through. I don't want this to get screwed up like the last deal and fall through the cracks.

Thanks,
Bill

Donn,

I need to get CH2MHill to get on board to help me with Wilcox, in Bristow, Oklahoma. The site will be added to the NPL and I will need a mailing list Adv. (Public Notice) Fact sheets, etc. Please get this started so we don't run out of time. I prefer working with CH, because they know exactly what I need and can get it done in a timely manner. Any questions please give me a shout.

Thanks,
Bill
